

To all IFIA member associations

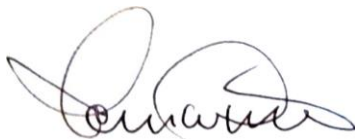

Establishment of the TTC.

It has earlier been announced through IFIAs reports and information letters about establishing the Technology Transfer Center (TTC) in Stockholm, Sweden. Now it is time for each IFIA member association to move into action. The first activity for each association is to appoint their *node*. Please, use the enclosed *form*.

In the enclosed reports and information letters you can read more about the establishment steps and a project description. In the report of March 5, 2016 addressed to the ExCo you will learn about the current development stages.

As soon as the nodes are registered in the TTC, we'll provide you with the required forms for your individual association members to utilize the TT-system.

You will also receive a more specific *instruction/agreement* on how to use the TT-system.
